ORGANIZATION

The Idyllwild Water District was formed on March 21, 1955 for the purpose of providing a domestic water supply to the community of Idyllwild, California under Section 30000 of the California Water Code. Improvement District No. 1 was established by Board action on March 10, 1966 to provide wastewater services within the community.

Independent Auditor's Report

Report on the financial statements

We have audited the accompanying financial statements of the Idyllwild Water District (the District), as of and for the year ended June 30, 2016, and the related notes to the financial statements, as listed in the table of contents.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States and the State Controller's *Minimum Audit Requirements for California Special Districts*. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the District as of June 30, 2016, and the changes in financial position and cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America as well as accounting systems prescribed by the State Controller's Office and state regulations governing special districts.

Other matters

Required supplementary information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the schedule of funding progress, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other reporting required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 16, 2016, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

MANAGEMENT DISCUSSION AND ANALYSIS

The intent of the management discussion and analysis is to provide highlights of the Idyllwild Water District's (the District) operational and financial activities for the fiscal year ended June 30, 2016. Readers are encouraged to review this section in conjunction with the accompanying financial statements and notes from the independent auditors.

OVERVIEW OF THE FINANCIAL STATEMENTS

The District operates under California Irrigation District Law as a utility enterprise. As such, the District presents its financial statements using the economic resources measurement focus and the full accrual basis of accounting, similar to methods used by private sector companies. These financial statements are designed to provide readers with a broad overview of the finances and also present changes in cash balances, and information about both short-term and long-term activities of the District. There are three required components to these statements; the MD&A, the financial statements, and the notes to the financial statements. As an enterprise fund, the district's financial statements include four components:

- 1) Statement of Net Position presents information on all of the District's assets and liabilities with the difference between the two reported as net position. The statement of net position provides the basis for evaluating the capital structure of the district and assessing its liquidity and financial flexibility. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating. Net position is displayed in three categories: net investment in capital assets; restricted; and unrestricted.
- 2) Statement of Revenues, Expenses and Changes in Net Position presents information which show how the District's net position changed during the year. All of the current year's revenues and expenses are recorded on an accrual basis, meaning when the underlying transaction occurs, regardless of the timing of the related cash flows. These statements measure the success of the District's operations over the past year and determine whether the District has recovered its costs through water sales, user fees and other charges.
- 3) Statement of Cash Flows provides information regarding the District's cash receipts and cash disbursements during the year. These statements report cash activity in four categories: operating; noncapital financing; capital and related financing; and investing. This statement differs from the statement of revenues, expenses, and changes in net position in that it accounts only for transactions that result from cash receipts and cash disbursements. As in the past, the statement of cash flows continues to reconcile the reasons why cash from operating activities differ from operating income.
- 4) Notes to the Basic Financial Statements provide a description of the accounting policies used to prepare the financial statements and present material disclosures required by generally accepted accounting principles that are not otherwise present in the financial statements. The notes are located immediately following the financial statements.

THE DISTRICT'S OPERATIONS - AN OVERVIEW

The District operates under the authority of Section 30000, Division 12 of the California Water Code and engages in water and wastewater activities, which are classified, as "proprietary". These activities are accounted for much like that of a private business using the full accrual method of accounting for financial transactions. Major activities include production and treatment of groundwater; sale and delivery of water to domestic and commercial accounts; and collection, treatment and disposal of wastewater. The District also owns a small fleet of vehicles and other rolling stock to support the various operating activities for water and wastewater.

FINANCIAL HIGHLIGHTS

WATER SALES:

Water sales decreased for the year by \$69,552 or 5.4% from the prior year's amount and ended the year at \$1,224,876. This is attributed to the conservation due to the drought and a decrease in cubic feet of sales by 594,279 c.f. Total cubic feet sold for the fiscal year was 9,839,136. The District is in a stage 2 water shortage emergency (voluntary water conservation) and will continue until it has sufficient water inventory. There were no new residential water connections and no new commercial connections.

WASTEWATER SALES:

Wastewater service charges increased by \$61,519 or 10.9% from the prior year and ended the year at \$624,203. The equivalent dwelling units increased by 41.61 E.D.U from the prior year or 3.11% to end the year at 1,378.36 E.D.U. There were no new residential or commercial connections added during the year.

CAPITAL ASSETS:

During the year, the water fund increased capital assets being depreciated by \$48,733. Overall, capital assets in the water fund decreased by a net of \$159,853 due to depreciation expense of \$208,586.

	2015/16 Amount	
Capital assets being depreciated - additions, net:		
2016 Ford F350	_\$	48,733
Total capital assets being depreciated - additions, net	\$	48,733

During the year, the capital assets of the wastewater fund increased by a net of \$418,745 from the prior year due to depreciation expense (\$56,611) and the following:

	2015/16 Amount	
Construction in progress:		
Beginning construction in progress	\$	572,559

Total additions	-	475,356		
Total capital assets being depreciated - additions, net	\$	475,356		

During the year, the capital assets of the recyclewater fund increased by \$286,706 from the prior year:

Construction in progress:	2015/16 Amount	
Construction in progress.		
Beginning construction in progress	\$	
Additions: Recycled water project		286,706
Total additions/transfers		286,706
Total construction in progress	\$	286,706

INVESTMENT INCOME:

This past year investment income experienced another reduction in earned percentages from the prior year. There are conservative investment policy restrictions on types of investments such as treasury bills, certificates of deposits, savings, money market funds, and local agency investment funds (state and local). Total investment income for the water and wastewater funds was a combined \$12,974.

PROPERTY TAXES:

This past year property tax revenues experienced a decrease in revenues from the previous year of \$24,031 or 5.8%. Total property tax revenues for the year ended was \$391,614.

DISTRICT OPERATIONS:

Combined operating expenses, excluding depreciation expense of \$265,197, totaled \$1,563,110 which represents an increase of \$101,785 or an increase of 6.97% from the prior year. Decreases occurred in the following expense categories: legal fees and net OPEB obligation costs.

DEPRECIATION EXPENSE:

The water fund's depreciation expense was \$208,586 and the wastewater fund's was \$56,611 for a total of \$265,197, an increase of \$14,585 or 5.82% from the prior year.

INTEREST EXPENSE:

The District had no outstanding interest bearing debt in the current year. During the prior year, the District made all debt service payments for certificates of participation for both principal and interest in a timely manner paying off the debt.

TOTAL REVENUES:

Combined revenues for the year totaled \$2,644,879 compared to the prior year of \$2,331,332 an increase of \$313,547 or 13.5%. The following table presents a comparison of revenues by category for the two years of 2014/2015 and 2015/2016:

COMBINED REVENUES BY CATEGORY FOR THE FISCAL YEARS ENDED JUNE 30, 2015 AND 2016

	2014/2	2015	2015/2	2015/2016 Change		Change

Unrestricted	2,593,521	3,420,782	827,261	31.9%
Total net position	\$ 8,768,158	\$ 9,583,868	\$ 815,710	9.3%

CHANGES IN FINANCIAL CONDITION OF THE DISTRICT:

The following provides explanations for some of the changes between fiscal years, as reflected in the above balance sheet data:

CURRENT ASSETS:

Current assets increased by \$817,660 or 26.7% from the prior year. This is due primarily to Grants and the increase in net position due to operations. Inventory increased by \$146. Service receivables increased by \$18,237 or 54.18% and property tax receivable decreased by \$1,411.

RESTRICTED ASSETS:

Restricted assets increased by \$662 from the prior year with an increase in cash with fiscal agent.

CAPITAL ASSETS:

Total net capital assets decreased by \$26,961 due to an increase in general plant of \$60,895 and an increase in accumulated depreciation of \$265,197. See Note 2 for additional information.

CURRENT LIABILITIES:

Current liabilities decreased by \$111,002 due primarily to a decrease in accounts payable of \$113,515 (sewer project), a decrease in unearned revenue of \$6,683, and an increase in compensated absences of \$3,898 and a decrease in retentions payable of \$15,410 (sewer project).

LONG-TERM DEBT OUTSTANDING:

The District currently has no long term debt outstanding.

NET OPEB OBLIGATION:

The District performed an in-house recalculation of the OPEB obligation for the "Retiree's Health Benefit Plan". A net increase in the OPEB obligation was recorded in the current fiscal year in the amount of \$86,653. See note 9 for more information.

CAPITAL ASSETS:

The District reported capital assets of \$6,163,086, net of accumulated depreciation, at the end of the fiscal year compared to \$6,190,047 in fiscal year 2014/2015, a decrease of \$26,961 or -0.4%. The following is a table comparing the change in capital assets between the two fiscal years:

CAPITAL ASSETS FOR THE FISCAL YEARS ENDED JUNE 30, 2015 AND 2016

			Change	
	2014/15	2015/16	Amount	%
Construction in progress	\$ 672,099	\$ 386,246	\$ (285,853)	-42.5%

DISTRICT REVENUE AND EXPENSE ACTUAL VS. BUDGET:

The table below compares actual revenues and expenses of the District to budgeted and/or projected amounts used by the District to monitor performance during the fiscal year. The overall change to net position was budgeted, excluding capital purchases, as a negative \$(60,885) compared to actual results of \$815,710, including a positive revenue budget variance of \$606,644 and a positive expense budget variance of \$269,951. The following is a table of total revenues and expenses comparing the actual results with budgeted projections:

ACTUAL VERSUS BUDGET FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Revenues	Actual	Actual Budget	
Water base fees and revenue Wastewater base fees and revenue Interest and other revenues Grant revenue Property taxes - 1% and standby fees	\$ 1,238,815 628,372 25,908 332,445 419,339	\$ 978,000 613,735 31,500 - 415,000	\$ 260,815 14,637 (5,592) 332,445 4,339

Total expenses	1,829,169	2,099,120	269,951
Change in net position	\$ 815,710	\$ (60,885)	\$ 876,595

The District's capital budget was \$889,500. The District incurred capital costs of \$524,089 during the year.

UPCOMING EVENTS:

The District was approved for a Recycled Water Project Grant/Loan in the amount of \$2,045,217 by the California State Water Resources Control Board. As part of the Grant agreement \$713,000 of the \$2,045,217 is a loan and will have to be repaid per the Grant agreement. There is also a requirement to restrict cash for repayment of said loan.

The District received a letter of obligation from USDA Federal Governmental Agency in the amount of \$215,000 of Horizontal and Vertical Well Rehabilitation.

The District was approved for a Community Development Block Grant of \$155,000 to a replace water pipeline.

Management believes its adopted *Reserve Fund Policy* is a clear and rationale guide for the accumulation and management of reserve funds. Ultimately, the balances in the reserve funds are based on decisions made by the Board and management and include factors such as local conditions and an analysis of the risks that influence the need for maintaining reserves as a hedge against uncertainty and loss. See note 5 for additional information.

CONTACTING THE DISTRICT'S FINANCIAL MANAGEMENT:

This management discussion and analysis section is designed to provide Idyllwild Water District elected officials, our customers, and creditors with a general overview of the District's financial activities for fiscal year 2015/2016 for public monies it receives and expends. If you have any questions regarding this section or require additional financial information, please contact the District.

Note 1: Significant accounting policies

Description of reporting entity

The Idyllwild Water District was formed on March 21, 1955 for the purpose of providing a domestic water supply to the community of Idyllwild, California under Section 30000 of the California Water Code. Improvement District No. 1 was established by Board action on March 10, 1966 to provide wastewater services within the community. The financial statements of the Idyllwild Water District include the financial activities of Improvement District No. 1 as an oversight component of the District. The oversight responsibility of the District arises from the fact that the two operations are related financially and have the same management and governing board.

Measurement focus and basis of accounting

The District utilizes accounting principles appropriate for an enterprise fund to record its activities. Accordingly, revenue and expenses are recognized on an accrual basis of accounting.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods (water) in connection with the principal ongoing operations.

The District recognizes revenue from water sales, wastewater service fees and water availability fees as it is earned. Taxes and assessments are recognized as revenue based upon amounts reported to the District by the County of Riverside, net of an allowance for delinquencies.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed.

Materials inventory

Inventory consists primarily of supplies used in the maintenance of plant and equipment and is valued at weighted average cost using the first in/first out (FIFO) method.

Net position flow assumption

At various times the District will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position, a flow assumption must be made about the order in which the resources are considered applied. It is the District's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

Water receivables

No allowance for doubtful accounts is provided because management believes all receivables are collectible.

Deposits and investments

Investments for the District are reported at fair value as applicable.

Interfund transfers

Transfers represent reimbursement amounts between funds.

Note 1: Significant accounting policies, (continued)

Capital assets and depreciation

Acquisitions of property, plant and equipment of \$5,000 or more with a useful life of greater than two years are capitalized and depreciated. Contributed assets are recorded at their fair value at the date of contribution. Self-constructed assets are recorded at the amount of direct labor and materials.

Depreciation is provided on the straight-line method over the following estimated useful lives:

Water District	<u>Years</u>
Source of supply	15 -100
Pumping plant	7 - 50
Treatment plant	25 - 40
Transmission and distribution	40 - 60
General plant	3 - 40
Improvement District No.1	<u>Years</u>
Subsurface lines	20 - 40
Wastewater treatment facilities	A COMPANY AND A STATE OF THE PARTY AND A STATE
Wastewater disposal facilities	5 - 40
	12 - 100
General plant	4 - 20

Cash and cash equivalents

For purposes of the statement of cash flows, the District considers all investments purchases with a maturity of three months or less to be cash equivalents.

Budgetary accounting

The District prepares and adopts budgets for both the Water and Improvement District, but does not present budgetary information because it is not legally required to adopt and adhere to a budget. All budgets are adopted on a basis consistent with generally accepted accounting principles.

Use of estimates

The preparation of these financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts in the statements. Actual results could differ from those estimates.

Net position is categorized as follows

- Net investment in capital assets This component of net position consists of capital assets, including restricted capital assets, net of accumulated depreciation reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.
- Restricted This component of net position consists of constraints placed on net position use through external constraints imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.
- Unrestricted This component of net position consists of net position that does not meet the
 definition of "restricted" or "net investment in capital assets."

Note 1: Significant accounting policies, (continued)

The District reports the following enterprise funds:

Water – This fund is used to account for the sale of water to domestic and commercial accounts. It is also used to account for the costs of distributing, new construction and repair and maintenance of various water facilities and other related infrastructure.

Improvement District No. 1 Wastewater – This fund is used to account for the treatment and disposal of wastewater. It is also used to account for the costs of collection, new construction and repair and maintenance of various wastewater facilities and other related infrastructure.

Recycled Water - This fund is used to account for the future use of recycled water within the District.

Note 2: Capital assets

The investment in capital assets at June 30, 2016 consists of the following:

The District is a participant in LAIF which is regulated by California Government Code Section 16429 under the oversight of the Treasurer of the State of California. Each participant may invest up to \$65,000,000. Investments in LAIF are highly liquid, as deposits can be converted to cash within twenty-four hours without loss of interest. Also, LAIF is overseen by the Local Agency Investment Advisory Board which consists of five members, in accordance with State statute. LAIF is not currently rated by any rating agency.

Interest rate risk

The District has adopted an investment policy which limits the weighted average maturity of the District's investments to one year as a means of managing their exposure to fair value losses arising from increasing interest rates.

Concentration of credit risk

During the fiscal year, the District did not hold investments in one issuer that represented 5% or more of the District's total investment portfolio. Investments issued or explicitly guaranteed by the U.S. government as well as mutual funds, external investment pools and other pooled assets are exempt from disclosure.

Note 3: Cash and investments, (continued)

Investments authorized by the California Government Code and the Districts' Investment Policy

The table on the next page identifies the investment types that are authorized by the California Government Code (or the District's investment policy, where more restrictive). The table also identifies certain provisions of the California Government Code (or the District's investment policy, where more restrictive) that address interest rate risk, credit risk, and concentration of credit risk. This table does not address investments of debt proceeds held by trustees that are governed by the provisions of debt agreements, rather than the general provisions of the California Government Code or the Districts' investment policies.

Authorized investment type	Maximum percentage of portfolio	Maximum investment in one issuer
United States treasury obligations US government sponsored	50%	Not applicable
enterprise securities	50%	Not applicable
California State warrants or notes	100%	Not applicable
Local Agency Investment Fund	67%	\$65,000,000
Money market mutual funds	25%	25%
Time certificates of deposit	50%	50%

Custodial credit risk

Custodial credit risk for deposits is the risk that, in the event of a failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The California Government Code requires that a financial institute secure deposits made by state and local governmental units by pledging securities in an individual collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The market value of the pledged securities in the pool must equal at least 110% of the total amount deposited by public agencies.

California law also allows financial institutions to secure the Districts' deposits by pledging first trust deed mortgage notes, having a value of 150% of the secured public deposits. At June 30, 2016, the District's deposits (bank balances) were insured by the Federal Depository Insurance Corporation or collateralized as required under California law.

Fair value measurements

The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The District has the following recurring fair value measurements as of June 30, 2016:

Local Agency Investment Fund (Water \$1,009,558 and Sewer \$910,584) of \$1,920,142 valued using Level 2 inputs by the Local Agency Advisory Board.

Non-negotiable certificates of deposit are not subject to fair value measurements.

Note 3: Cash and investments, (continued)

Credit risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. State law limits investments in certain investments in commercial paper, corporate bonds and mutual funds to the top two ratings issued by nationally recognized statistical rating organizations. The District's investment policy further limits investments in Money Market Mutual Funds to funds that carry the highest rating of at least two of the three largest national rating organizations.

Investment type	Amount	Minimum legal rating	Rating	١	Not rated

Total investments -					
Improvement District No. 1	\$ 1,426,064			\$1	,426,064

Note 4: Property tax calendar

Property taxes are assessed and collected each fiscal year according to the following property tax calendar:

Lien date	March 1
Levy date	July 1 through June 30
Due date	November 1 – First installment
	March 1 – Second installment
Delinquent date	December 10 – First installment
	April 10 – Second installment

Under California law, property taxes and other charges (such as assessments) are assessed and collected by counties up to 1% of assessed value, plus other increases approved by voters. Property tax revenues are pooled and then allocated to agencies based on complex formulas prescribed by state statutes. The County of Riverside bills, collects and remits to the District property taxes and assessments through the County's property tax billing process.

Note 5: Net position

The District has adopted net position reserve policies which clearly identify reserve categories and purposes while also setting target levels that are consistent with the District's mission, uniqueness and philosophy. The District believes the reserves are prudent fiscal management tools which provide a cornerstone of long-term financial management. The reserve balances are reviewed annually to ensure they meet the needs, current and long-term, of the District. At June 30, 2016, the District had the following reserves in unrestricted net position:

Net position reserves	 Water	Dist	Improvement District No. 1 - Wastewater		
Working capital	\$ 112,500	\$	37,500		
Emergency	150,000		50,000		
Capital improvement and replacement	150,000		50,000		
Vehicle and equipment replacement	75,000		25,000		
Vacation/sick/annual leave liability	37,500		12,500		
OPEB	 420,000		140,000		
Total reserves	\$ 945,000	\$	315,000		

Note 6: Compensated absences payable

Vested or accumulated vacation leave is recognized as an expense and liability as the benefits accrue to the employees. Pursuant to GASB Statement No. 16, *Accounting for Compensated Absences*, only the vested portion of sick pay benefits are recognized as a liability.

	Beginning balance		Additions		Deletions		Ending balance	
Compensated absences	\$	31,590	\$	3,898	\$	-	\$	35,488

Note 7: Risk management

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. During the year ended June 30, 2016, the District participated in the Association of California Water Agencies Joint Powers Insurance Authority (JPIA), which was organized for the purpose of providing liability insurance for the member agencies. The JPIA is a risk-pooling self-insurance authority created under the provisions of California Government Code Section 6500. The JPIA is governed by a board consisting of a representative from each member agency. The board controls the operations of the JPIA, including selections of management and approval of operating budgets. The purpose of the JPIA is to arrange and administer programs of insurance for the pooling of self-insured losses and to purchase excess insurance coverage. The accounts and records of ACWA/JPIA are audited by an independent certified public accounting firm.

Note 7: Risk management, (continued)

The District has deductibles as follows:

Buildings, fixed equipment and personal property:	\$2,500
Mobile equipment:	\$2,500
Licensed vehicles:	\$1,000
Crime	\$1,000
Boiler and machinery	various

The District pays annual premiums for the coverages, which are subject to retrospective adjustments based on claims experience. The nature and amounts of these adjustments cannot be estimated and there were no instances in the past three years where a settlement exceeded the District's coverage.

Note 8: Employees' retirement plan – defined contribution

All permanent employees hired on or before December 31, 2013 are covered under the Idyllwild Water District Money Purchase Pension Plan (the Plan) 401(a) administered by the District through ING Pension acting as trustee. The Plan is fully funded by a contribution rate of 21.5% of eligible salaries and wages made entirely by the District. The Board of Directors of the District has the authority, in its sole discretion, to amend, reduce contributions or terminate the plan at any time.

The District adopted a new pension plan 457(b) starting January 1, 2014. For new hires on or after January 1, 2014, the District contributes 10% for each new employee and matching up to 5%, if the employee elects to contribute up to 5%. The 457(b) Plan is administrated by the District through ING pension acting as trustee.

The 457(b) Plan is also available to all current employees hired before December 31, 2013 however, the District will not provide matching contributions.

District employees are also covered under Social Security, funded equally by the District and the employee, or as prescribed by applicable laws.

Note 9: Postemployment benefits other than pensions

Plan description

The Idyllwild Water District administers a single-employer benefit healthcare plan (the Plan). The Plan provides lifetime healthcare insurance for eligible retirees and their spouses through the District's group health insurance plans, which covers both active and retired District members. Benefit provisions are established and can be amended by the District's Board of Directors. The Plan does not issue a publicly available financial report.

Funding policy

Contribution requirements are set by the District's Board of Directors. The District contributes 100% of the cost of current-year premiums for eligible retired plan members and their spouses. For fiscal year 2016, the District contributed \$31,750 to the Plan. The District is funding the Plan on a pay-as-you go basis. During the 2014 fiscal year, the plan was closed to new entrants.

Note 9: Postemployment benefits other than pensions, (continued)

Annual OPEB cost and net OPEB obligation

The District's annual other postemployment benefit (OPEB) cost (expense) is calculated based on the annual required contribution of the employer (ARC). The District has elected to calculate the ARC and related information using the alternative measurement method permitted by GASB Statement 45 for employers in plans with fewer than one hundred total plan members. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The following table shows the components of the District's annual OPEB cost for the year, the amount actually contributed to the Plan, and changes in the District's net OPEB obligation to the Plan:

Annual required contribution	\$	121,664
Interest on net OPEB obligation	2.0.	29,882
Adjustment to annual required contribution		(34,047)
Annual OPEB cost (expense)		117,499
Contributions made		(30,846)
Increase in net OPEB obligation		86,653
Net OPEB obligation, beginning of year	-	747,051
Net OPEB obligation, end of year	\$	833,704

The District's annual OPEB cost, the percentage of annual OPEB cost contributed to the Plan, and the net OPEB obligation for fiscal year 2016, and the two preceding years is as follows:

Fiscal year ended	ual OPEB (expense)	Percentage of OPEB cost contributed	Net OPEB obligation		
June 30, 2014 June 30, 2015	\$ 148,433 116,118	11.17% 27.35%	\$ 662,683 747,051		
June 30, 2016	117,499	24.16%	833,704		

Note 9: Postemployment benefits other than pensions, (continued)

Funded status and funding progress

The funded status of the Plan as of June 30, 2016, was as follows (as of the January 1, 2015 actuarial):

Actuarial accrued liability (AAL)	\$ 999,983
Actuarial value of plan assets	-
Unfunded actuarial accrued liability (UAAL)	\$ 999,983
Funded ratio (actuarial value of plan assets/AAL)	-
Covered payroll (active plan members)	\$ 560,000
UAAL as a percentage of covered payroll	178.57%

As of the January 1, 2015 actuarial report, the actuarial accrued liability for benefits was \$999,983, all of which was unfunded. The covered payroll (annual payroll of active employees covered by the plan) was \$560,000, and the ratio of the underfunded actuarial accrued liability to the covered payroll was 179%.

The projection of future benefit payments for an ongoing plan involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funding status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Methods and assumptions

Projections of benefits for financial reporting purposes are based on the substantive Plan (the Plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and the plan members to that point. The methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The actuarial cost method used was the entry age normal cost method in the January 1, 2015 valuation. The unfunded actuarial liability is being amortized as a level percentage of payroll on a closed basis.

Changes since the June 2011 AMM valuation include:

- Plan experience relative to prior assumptions. This includes factors such as more or fewer employee terminations or retirements than assumed, as well as premiums and retiree benefit levels higher or lower than assumed;
- Changes in retiree medical benefits for those hired by the District after December 31, 2013;
- Revised assumptions for mortality (including projection of future improvements, resulting in longer life expectancies), termination and retirement;
- Recognition of dental, vision and/or prescription drug coverage in addition to supplemental medical coverage for retirees and/or their spouses covered by Medicare; and
- Differences in the rates in which future premium levels will increase.

Note 9: Postemployment benefits other than pensions, (continued)

The following simplifying assumptions were made:

Retirement age for active employees

Retirement age for active members is assumed to be when a member attains Medicare eligibility age. However, if a member will not qualify for OPEB benefits at the age of Medicare eligibility, the year of retirement is assumed to be the year OPEB benefit qualifications have been met. Under current policy, a member must have been employed by the District for 10 years and have attained the age of 55 to qualify for OPEB benefits.

Marital status

Marital status of members at the calculation date was assumed to continue throughout retirement.

Mortality

Mortality rates were determined using CalPERS experience study using data from 1997 to 2007. The valuation used the CalPERS Public Agency Miscellaneous tables projected by applying Scale AA on a fully generational basis.

Turnover

Non-group-specific age-based turnover data from GASB Statement 45 were used as the basis for assigning active members a probability of remaining employed until the assumed retirement age and for developing an expected future working lifetime assumption for purposes of allocating to periods the present value of total benefits to be paid.

Healthcare cost trend rates

The expected rate of increase in healthcare insurance premiums were based on projections of the Association of California Water Agencies for medical, dental and vision coverage and projected to increase annually at a rate of 5%.

Health insurance premiums

2014 health insurance premiums for retirees were used as the basis for calculation of the present value of total benefits to be paid.

Inflation rate

The expected long-term inflation assumption of 3% was used.

Payroll growth rate

The expected long-term payroll growth rate used was 3.25%.

Discount rate

Based on the historical and expected returns of the District's short-term investment portfolio, a discount rate of 4% was used since the plan is unfunded.

Idyllwild Water District Required Supplementary Information – Schedule of Funding Progress for the Retiree Health Plan (OPEB) June 30, 2016

Actuarial valuation date	va	ctuarial alue of ssets (a)	Actuarial accrued liability (AAL) entry age (b)		Unfunded AAL (UAAL) (b-a)		Funded ratio (a/b)		Covered payroll (c)	UAAL as a percentage of covered payroll [(b-a)/c]
06/30/10	\$	-	\$	765,613	\$ 765,613		0.0%	\$	526,400	145%
06/30/11		-	2	2,577,048	2,577,048		0.0%	***	574,301	449%
